The mouldings and decorative products found on this page and pages 10-36, 42-51, & 59-66 are all manufactured from a dense polyurethane and are pre-primed for your finishing (although some, such as on this page, come pre-finished). The hardness of the polyurethane approximates that of soft pine, but is not subject to mildew, warping, or splintering and can be easily sanded and finished. The stable polymer composition of the material not only allows these products to be lightweight, but also moisture, mold, and heat resistant ... ideal for indoor or outdoor use.

The combination mouldings shown on pages 2 through 4 of the Regal Collection are installed using two pieces of moulding. There are 5 choices for the base piece and 5 choices for the top piece creating a total of 25 unique designs. With the exception of GF-23H and GF-24H (made from polyurethane), the mouldings in this collection are made from wood. A baked ceramic coating is applied and the mouldings are finished with either a gold foil (items marked with H) or are hand painted.

Gardenfalls

The Gardenfalls series is an elegant water feature that blends a contemporary shape with water flowing down ether glass, slate, or mirrored panels. This series provides you with several choices and combinations to fit almost any decor setting, indoors or out. The reservoir is made of stainless steel and is beautifully finished with a durable powder coating.
