

# Michelangelo Series

## ceiling medallions

### Materials & Tools

- Screw Gun / 2" Sheet Rock Screws
- Adhesive / Caulking Gun
- Tape Measure / Pencil
- Caulking (paintable latex)
- Utility Knife

### Step 1 getting started

If you are installing the medallion with a ceiling fan, chandelier or light, make sure the power is shut off at the breaker before attempting installation. Turning off the light switch WILL NOT prevent you from being shocked. If you have any doubts call an electrician.

Medallions are for decorative purposes only and cannot support the weight of a fan or light fixture. Your fixture must be supported by a support or junction box in the ceiling.

### Step 2 aligning the medallion

Using your center point or fixture as a reference, lightly mark the ceiling with pencil where the perimeter of the medallion will be.

### Step 3 adhesive

Adhesive should be applied liberally to the backside of the medallion where it touches the ceiling. Sheet rock screws will secure the medallion while the adhesive sets. You can use any adhesive that is rated for use with wood (check the back of the label) -- we have found that using Liquid Nails™ works well and is available at most home improvement stores.

### Step 4 installation

Consult your fixture's instructions. You may need to purchase additional hardware to make your fixture compatible with the offset of the medallion.

Before beginning, be sure to have several people available to lift and hold the medallion in place while you secure the medallion to the ceiling. With the medallion on the ground, apply adhesive liberally to the

backside where it will touch the ceiling. Lift the medallion up near the ceiling and feed the electrical wires through the center of the medallion. Once the wiring is through, press the medallion against the ceiling and make sure it is properly aligned.

While your helpers continue to hold the medallion in place, use 2" sheet rock screws around the perimeter to secure it to the ceiling. On round models there will usually be exposed holes for you to screw through.

On rectangular models screw in between the teeth on the dentil section that borders the medallion. You can later cover the screws with the supplied caps for round medallions, or touch up the screw heads with the gold paint provided for rectangular medallions.

### Weights & Sizes

Style	Size	Weight
BRRD-8	31.5" Diameter	10 lbs
BRRD-9	36" Diameter	12 lbs
BR-1010	39" x 39"	16 lbs
BRR-11	43" Diameter	15 lbs
BR-1212	47" x 47"	23 lbs
BR-1216	47" x 63"	30 lbs
BR-1218	47" x 71"	34 lbs
BRR-13	51" Diameter	21 lbs
BRC-1324	51" x 94"	45 lbs
BRD-1324	51" x 94"	47 lbs
BR-1515	59" x 59"	34 lbs
BRRD-16	63" Diameter	30 lbs
BRH-1622	63" x 87"	50 lbs
BRRB-1722	67" x 87"	40 lbs
BRRD-18	71" Diameter	38 lbs
BRRD-20	79" Diameter	47 lbs
BRRD-21	83" Diameter	52 lbs
BR-1824	71" x 95"	60 lbs
BRD-1926	75" x 102"	70 lbs
